TAILORED EXPERTISE
& ACCURACY

I2TSME Global LLC, Consulting is the Subject Matter Experts offer decades of superior Advanced Technical Engineering & Technology Management with a seasoned core of proven leaders. Our organization’s exposure, customer understanding, and community of knowledge is a result of oriented, commercial, defense and industry experience. Supportive of the most demanding requirements by Federal Agencies & the US Military Command requirements by shaping effectively tailored business productivity areas and capabilities for all mission-essential clients. Malicious actors consistently and effectively target data, information, and technology: They use threats and other methods aimed at accessing, changing, or destroying sensitive information, which violates numerous rights to privacy and published federal laws. I2TSME Global is an operational capability that can be employed to assess, support, and defend these key security areas.

I2TSME Global capability product lines are based on the importance of identity, protection, and detection as it relates to an organizations critical data, information, and infrastructure. With unrivaled skill, our organizational asset protection engages awareness research and information gathering while focusing on the three pillars of Information Technology Management: People, Processes & Technology (PPT). Compliance driven Technical Innovation, Research and Development (TIRD) leverages needs, business synchronization, communications, and advocacy security levels. Specifically, these efforts combined pivot towards delivering a visionary core practice of superior cutting-edge products through advanced technology services and data analytics, while addressing advanced critical challenges.

I2TSME Global promotes a valued-added fully comprehensive real-time tech consulting; that’s responsive information security; w/ requirements & planning to a quality business model of high-value operational plans & strategies alike. It must never be taken for granted, leadership, our history, and how security shaped our lives and business ethical practices that are significantly important and undervalued. Because it’s our core roots of a Task Oriented, Time-Honored Military Tradition of Professional Leadership, Honor & a Warrior Valued - Educational Practices: a principle “Accuracy & Expertise” at Work!

Milestone Benchmark Operations: CRIMSIIIN I2TSME Model

- **Compliance in IT, IS, Cybersecurity & Intel:**
 - High level precise & standards for industry Agile mission partners via governance, Security and compliance measures to technical R&D engineering solutions
 - Actions will be consistent Commercial, Federal Acquisition Regulations (FAR) 2020 and the DoD Security Policy & Laws
- **Resources & Supply Chaining Capacity:**
 - Review, analyze & address all Acquisition principles to reduce risk in all underutilized resources
 - Build increasing reliability in all phases of Program & Project Management (P/PM)
- **Implementation & execution (Info Tech. (IT) & Info. Systems (IS):**
 - Identify requirements, address gaps w/ mission-related advanced techniques & fundamentals
- **Management and Executive Viewpoint :**
 - Lead with valued integrity of all issues & facts to tackle and solve critical risk, technology, assurance, and incidents based on all legal ethics; to achieve a clear high & focus level of Best Practices & metrics
